LABELING

We label free with printed labels when requested, BUT ONLY WHEN REQUESTED.

PACKING

We pack free by a light and secure system which we believe is the best in use. Plants are packed bare root. We do not ship planted pots or dishes.

SUBSTITUTIONS

Unless instructed, we use our judgment in the case of short items.

WE ARE WHOLESALE ONLY

and believe we are the only California shippers who absolutely refuse retail business.

OUR GUARANTEE

We guarantee safe arrival by Railway Express only. Parcel post and freight shipments travel at purchaser's risk for loss or damage en route. If plants should arrive in bad order, secure inspection reports from delivering agency and send it to us. Claims for loss in transit cannot be considered without it. If upon opening shipment, any customer believes we have not shipped fair value and good quality, the entire shipment or portion should be returned to us at once by express collect.

We will refund any money paid out for such stock and transportation.

PLAIN TALK

Rising costs have compelled an increase in prices, and they may be even higher in the near future. Most of our supplies are up forty to fifty per cent. Our labor is up forty per cent. It averages better than a cent a minute for every person on the job, so careful management is necessary to propagate, grow, dig, pack and sell plants at the prices of this new list.

We have the largest supply in our history, and it is probably larger than the supply of any other dealer, yet we know that we will not be able to meet all demands. We have severely pruned our mailing list, and for the past six months have not advertised for new customers, as we prefer to try to take care of our old ones. Every order should list substitutes or carry instructions regarding short items.

Order early. Both the mail and express services are slower than we have been accustomed to. All orders are numbered and shipped in rotation as received. Prompt shipment has always been our aim, but oftentimes our packers have four or five days' work piled up ahead of them. Remember if your express office is different from your mail address, be sure to note it plainly on every order. Your orders will be more accurately handled if you use the enclosed order blank. We provide a duplicate for you to use in keeping a carbon copy.

All illustrations of potted plants in this price list show plants of our regular shipping sizes planted in 2½" pots. We do not ship plants in pots.

Don't be a Sap and hire a Jap unless you want some shrewd, mean and unscrupulous competition within a very short time.

California Grown Dish Garden Assortments

The assortments we ship are well-rooted, clean and healthy plants grown especially for the small pot plant and dish garden trade. We ship them bare root, properly and lightly packed, so that you may expect a hundred salable plants out of every hundred purchased. Good plants are worth good packing.

Our assortments are not "loaded" with junk. They are carefully selected kinds, in well-balanced assortments. We ship equal numbers of each kind that we include, in all assortments, except Dog Tail assortments. Those who buy in small lots and who are not thoroughly familiar with cactus and succulents, will find our assortments more useful than their own selections. We label free with printed labels upon request, but only when labeling is requested.
